

Fantasy Football Player Ownership

Tomas Kersulis

Preface:

The goal of this project is to look at the most popular players that league winning teams had on their roster during the last 5 NFL seasons and look for trends in the types of players that gave a team the highest chance of winning their league.

Methodology:

In case you did not see my previous project where I simulated 100,000 fantasy football leagues through the last 5 NFL seasons and evaluated the most popular draft strategies, I'll link it here: <https://gamedaymetrics.wixsite.com/ff-data-analytics/draft-strategies-and-simulations>. The procedure of simulating these leagues is much the same in this project and if you'd like a more in-depth explanation of this procedure, you can read more about it in my previous post, but here's an extremely short summary:

- Simulated 100,000 fantasy football leagues with 12 teams with 0.5 PPR scoring with a 1 QB, 2 RB, 2 WR, 1 TE, 1 FLEX, 1 DST, 1 K, and 7 bench spot roster over the last 5 NFL seasons.

Most Valuable Draft Picks 2018-2022:

We will look at what % of teams with each player on their roster ended up winning their league.

This will show which players each year were the best picks at their ADP (the most valuable draft picks of that year).

Name, win %, ADP, End of Year Ranking

2018:

1. James Conner: 21.39%, RB63, RB6
2. George Kittle: 20.39%, TE13, TE3

11. Chris Godwin: 4 seasons, 9.89%
12. Pittsburgh Steelers DST: 4 seasons, 9.77%
13. Melvin Gordon III: 4 seasons, 8.67%
14. Baltimore Ravens DST: 4 seasons, 8.47%
15. Robbie Gould: 4 seasons, 8.21%

Main Takeaways from Data

The win % of a player is the percent chance a team had of winning their league if they drafted that player. For example, in 2022 27.18% of teams that drafted Josh Jacobs won their league. For a 12 team league, the average win % for a player is 8.33%. Any player above a win % of 8.33% “outperformed” their ADP and any player below 8.33% “underperformed” their ADP.

- The overall RB1 was in the top 10 each season and having the RB1 more than doubled your chances of winning your league in every year except 2022 (1.86x as likely).
- There were 23 RBs, but only 9 WRs in the top 10 most valuable players from 2018-2022. This means that drafting one of the top RBs that outperform their ADPs is much more important to a team than drafting one of the top WRs of that year.

- Each year there was at least one TE in the top 10 win % players and in every year except 2019 the TE1 of the year was in the top 10 win % players (in which case both the TE4 and TE6 were, as they drastically outperformed their ADPs of 13 and 12, respectively). This shows that securing the TE is also extremely important to a team's success.
- The success of Christian McCaffrey and Travis Kelce over the last 5 years has been spectacular. McCaffrey has won 16.02% of leagues he has been drafted in, almost double the average player's, and Travis Kelce has outperformed his ADP in each of the last 5 NFL seasons.
- The New England Patriots DST has been the best defense in fantasy football over the last 5 years as it has made the top 10 win % players twice and has outperformed their ADP every year.

Year-By-Year Top 10 win % by Position (players must be drafted in at least 1% of leagues to be eligible):
